BERNARDO ALENCAR

Front-end Developer

LinkedIn: bernardo-alencar | **GitHub:** F-Bernardo-09 | **Site:** bernardo-alencar.dev

Email: bernardoalen09@gmail.com

Front-end developer building responsive interfaces and consistent visual systems. I also act as a bridge between business, design, and development, an experience that brings product vision beyond code. Graphic and UI design: 6+ years of freelance work.

PROFESSIONAL EXPERIENCE

Business Consultant (Trainee > Full Consultant) — Loopis Jr, EJ *Mar. 2026 – Present*

- Structure commercial proposals and contracts for external clients of technology projects, moving from trainee to full consultant in 6 months.
- Price and define the technical scope of projects, acting as a bridge between client requirements and the development team.

Freelance Designer — Solitu, Creative Agency (Portugal) *Aug. 2024 – Present*

- Develop visual identity and UI/UX design for international clients.
- Produce artwork for social media and visual campaigns.

Freelance Graphic Designer — Self-employed *2020 – Present*

- Create visual identities and logos for small businesses, from briefing to delivery.
- Produce and revise graphic material for social media and printed pieces, meeting deadlines.

PROJECTS

Verde Árido — Agtech Platform (link)

- Platform for forage cactus (palma forrageira) management and precision livestock nutrition for the Brazilian semi-arid region, built by a team of three.
- Selected among 477 projects in the 14th edition of Campus Mobile (Instituto Claro/POLI-USP) and finalist in the Green Tech & Agtech category, with an immersion week in São Paulo.
- Worked on design and user experience (UX), defining features and leading the platform's prototyping, validated in the field with more than 50 rural producers.

Guardiões da Bandeira (link) — Mobile Game (Mandacaru Studio)

- Mobile multiplayer 2D strategy game inspired by Capture the Flag and based on Brazilian folklore.
- Among the top 5 projects at Game Dev Quest (independent game funding circuit in Paraíba), winning the best trajectory trophy and an award trip to Germany. The game reached the final stage, presenting its business model to investors, publishers, and mentors.
- Worked on UI prototyping, map design, the studio's brand identity, and team/budget management under a public funding grant (FAPESQ/SECTIES).

Website Portfolio — bernardo.dev (link)

- Bilingual SPA built with React 19, TypeScript, Vite, React Router, and styled-components, with project detail pages assembled from typed content blocks.
- Internationalization with i18next/react-i18next, localized routes in Portuguese and English, and dynamic SEO (canonical, Open Graph, and hreflang), with a sitemap.
- Contact form via Web3Forms, with hCaptcha, honeypot anti-spam, an environment-variable key, and translated submission, success, and error states.
- Light/dark theme with Context API and a custom hook, localStorage persistence, and fallback to the system's theme preference.
- Deployed on Vercel, with security headers and a Content-Security-Policy.
